Concrete pavers over a PVC membrane

AWS™ with natural stone pavers over waterproof membrane

Hydrapressed slabs over a concrete patio

The AWS™ Pedestal System promotes a “green” environment. Sustainably designed, it is constructed of fully recyclable, durable ABS and PVC plastics and 100% recycled rubber.

Atlanta City Hall Green Roof

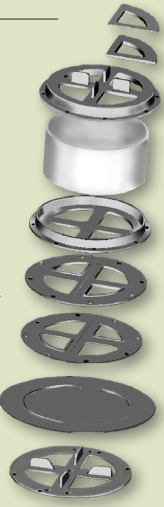

The quick and easy “press fit” installation of AWS Pedestal components requires no gluing or other attachments. Each AWS Pedestal holds up to 11,000 lbs. and works with nearly all kinds of pavers, slabs and stone.

AWS components pack in fewer boxes and weigh less than alternative pedestals, reducing the “carbon footprint” and saving money on shipping costs!

The AWS Pedestal System

- TOP SHIMS (1/16" and 1/8")
- TOP CAP
- SDR-35 PVC*
- BOTTOM CAP
- BOTTOM SHIMS (1/16" and 1/8")
- BUFFER PAD
- JOIST PLATE

U.S. PATENT 6,520,471 B2

8 “press fit” components and the 4” PVC Pipe* easily create heights from 1/4” to over 20”.

*PVC Piping not included, available locally

Before

After

AWS Pedestals adapt to all types of decks, patios and waterproof membranes—and stairs too!
